

SILANG DISIPLIN DALAM MENTADBIR PEMBANGUNAN

Nasrudin Mohammed

Abstract

Development efforts are considered one of the main thrusts of any government. There are various school of thoughts regarding the approaches to development. Some of them are subjected to the ideologies of governments while some other elements, which affect the patterns and pace of development, include the level of readiness among the people, economic growth, intellectual capacity, human resource, level of education and also level of maturity among the people. This paper sets to reveal the basic conception of development by looking at the administrative aspects.
